

Hebden Bridge Flood Alleviation Scheme

The Environment Agency is working with Calderdale Council and BAM Nuttall to deliver a Flood Alleviation Scheme for Hebden Bridge.

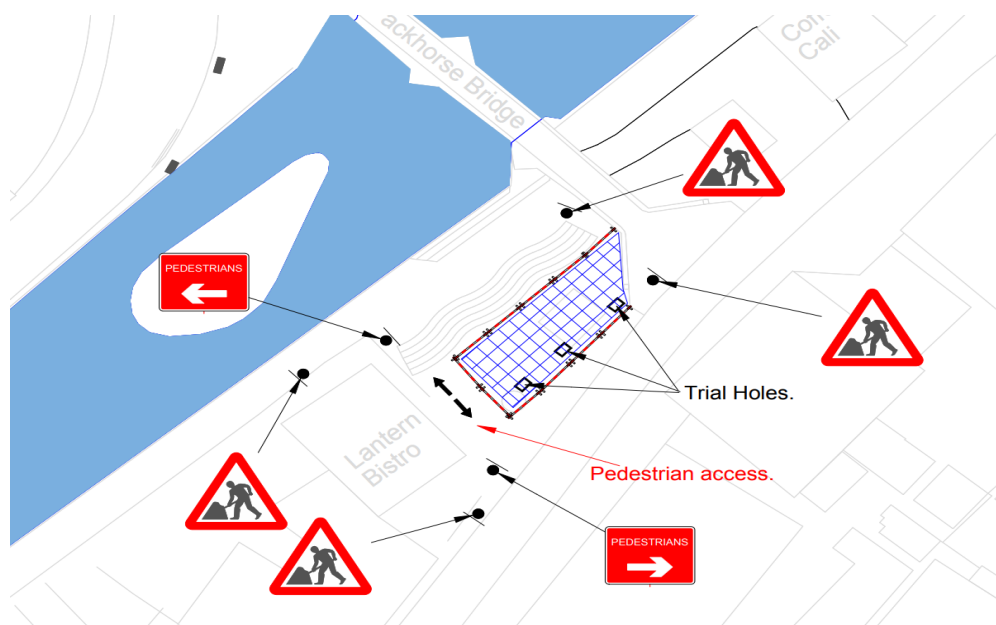

Notice of Work

21 February 2023

Investigation work at Bridge Gate

As part of ongoing preparation work for the Hebden Bridge Flood Alleviation Scheme, our contractor BAM Nuttall will shortly be carrying out some additional investigation work at Bridge Gate. This investigation work will assist with the design and future construction of the scheme.

From Monday 27 February, for approximately 10 working days, we will be hand digging trial holes across a section of the Bridge Gate steps – as shown in the diagram below. These works will take place from 8am until 5pm each day. This notice is for information only - we do not expect these works to cause any major disruption and access to the steps will be maintained throughout the works.

Thank you for your patience as we carry out this work. If you have any concerns or questions, please email us at HebdenBridgeFAS@environment-agency.gov.uk. For more information about the Hebden Bridge Flood Alleviation Scheme, please visit www.eyeoncalderdale.com – Flood Works / Hebden Bridge FAS pages.

You can also sign up to receive updates about the scheme via email, please send 'subscribe' to HebdenBridgeFAS@environment-agency.gov.uk.
