

Stubbing Holme Road Flood Alleviation Scheme

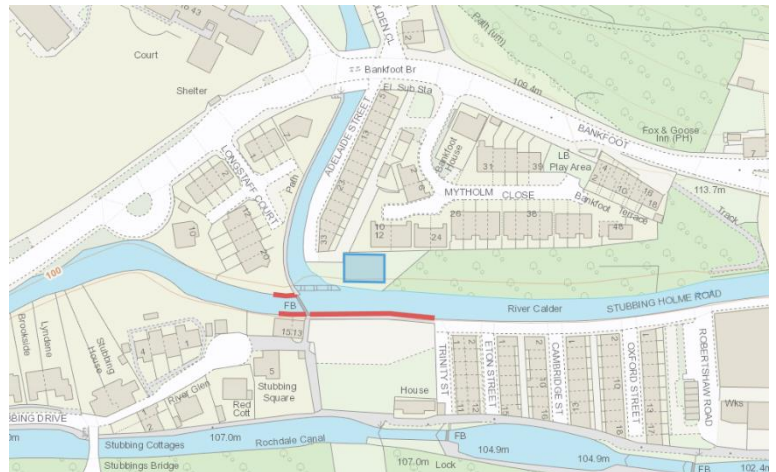

August 2023

Keeping You Informed

River Calder Wall Vegetation Clearance

As part of the continued preparation work for the Stubbing Holme Road Flood Alleviation Scheme (FAS), our suppliers need to undertake an engineering inspection to the walls along the River Calder to fully understand their structural condition. This will help identify the optimum design solution for the required flood wall.

We will shortly be undertaking some vegetation clearance work to these walls to help enable this inspection.

What will the work involve?

Our operational team will be undertaking vegetation clearance in the area shown on the map above. They will be using hedge cutters to cut back the vegetation.

The vegetation will then be removed from the channel. The work will be undertaken during week commencing 28th August and will take around one day.

The red line shown on the map above is the location where the vegetation will be removed along the walls of the River Calder. The area shown in blue will be where our operations team will access the river and park their vehicles.

We do not expect any disruption to local residents as we carry out this work, but if you do have any questions, please contact the project team by emailing HebdenBridgeFas@environment-agency.gov.uk.

Do you have questions about the flood alleviation schemes for Hebden Bridge?

The Environment Agency's new Flood Information Centre situated on Valley Road, Hebden Bridge is now open on Mondays and Fridays (not including bank holidays) between 10am-2pm. Visit us to speak with members of the project team and view information about the Flood Alleviation Schemes for Hebden Bridge Town Centre, Stubbing Holme Road and Erringden Hillside.

To receive copies of updates about the progress of our work on any of the schemes via email, please send 'subscribe' to HebdenBridgeFAS@environment-agency.gov.uk. Updates can also be found on www.eyeoncalderdale.com under the Project Pages.
